Overview

All the animals in the vast jungle used to each live with their own kind. Monkeys with monkeys, zebras with zebras and the bugs together...

But one day, a devastating and heavy rainfall washed away the features and colors from all the animals, leaving them in a state of fear, after losing all their bearings.

However, they soon discover the splendid mix of their traits and colors in the familiar waters of their cherished lake. This beautiful surprise makes them forget their worries and allows them to have fun with one another, taking notice that they are not all that different after all.
