

# 我的地图书

Embark on a journey through a child's imaginative perspective of the world in the delightful picture book, "My Map Book" by Sara Fanelli. With a fresh new cover, this book offers a captivating exploration of maps that invites young minds to see their surroundings through a unique lens.

Lauded by the School Library Journal as an imaginative and child-centered gem, "My Map Book" is not only enjoyable but also an ideal tool for educators introducing mapping and autobiography concepts. Each vivid spread of this enchanting book presents intricate maps that allow children to navigate their place in the world from their own point of view.

Featuring twelve beautifully illustrated maps, such as "Map of My Day" and "Map of My Family," the book captures children's curiosity while imparting valuable lessons in mapping and storytelling. A perfect fit for the inquisitive and artistic, these maps offer a creative introduction to recording, mapping, and personalizing one's environment.

At the end of the reading adventure, young readers can unfold the jacket, transforming it into a poster-size map, ready for drawing and creating. "My Map Book" is a treasure trove of exploration, empowering young minds to chart their own imaginative territories.
